

**REMARKS**

This Supplemental Response to Office Action is being filed in response to a telephonic interview conducted between Applicants' attorney, Wayne Bailey, and the Examiner on January 24, 2006. In such interview, the Examiner noted that the terminology used on page 19, line 8 of the present patent specification was inconsistent with the terminology used on page 9 of the present application, in that in one instance (on page 19) the term 'logical volume manager' was used when describing the logical volume control block (LVCB), and yet in the other instance (on page 9) the term 'logical volume' was used when describing the LVCB. The Examiner indicated that he believed the word manager should not be included on page 19, line 8. Applicants are amending the Specification herewith in accordance with this concern, such that the terminology used on page 19, line 8 is consistent with the terminology used on page 9, line 13 ('the LVCB area within the logical volume'), and is also consistent with the terminology used on page 9, line 15 ('the LVCB area of the logical volume'); page 19, line 6 ('the LVCB area within the logical volume'); page 19, line 14 ('the LVCB area of a logical volume'); and page 19, line 24 ('the LVCB area of the logical volume'). Applicants are also amending the Summary of the Invention on page 6 to similarly provide consistent terminology with respect to the LVCB.

DATE: January 24, 2006

Respectfully submitted,

Gerald H. Glanzman
